

Diaper Wrap

for dogs with urinary incontinence,
and during heat cycles.

Distributed by the Biko Physio Brace, North America, LLC

Preventing urine scalds and infections are critical components in the care of incontinent hospitalized patients. Cofounder, Annie Janis, early on in her tenure as CEO of the Animal Rehabilitation and Wellness Institute in Raleigh, North Carolina, began to search for the perfect diaper wrap that would meet the needs of their hospitalized patients. The diaper wraps would have to be: well-tolerated, light weight, waterproof, custom fitted, user friendly, and attractive enough for pet parents to want to use at home. None of the diaper wraps available on the market met all of the criteria - so Annie and her treatment team began designing one that would. Many design iterations later, they settled on the **FemWrap** and **MaleWrap**. They soon became their diaper wraps of choice.

What is a FemWrap? MaleWrap?

The **FemWrap** is a diaper specifically designed for female dogs and cats with urinary incontinence, and can be used during their heat cycle. It is made of machine washable cotton flannel, and a soft, light-weight, waterproof fabric used on the inside panels (the same material that is used for human baby diapers).

The **MaleWrap** is made specifically for male dogs and cats and uses the same washable cotton flannel and waterproof fabric.

Every diaper wrap has a Velcro closure and is custom fitted to your pet.

To use either the **FemWrap** or **MaleWrap**, just slip a disposable pad inside. Pads come in different sizes and absorbencies and are available at your local pharmacy or supermarket in sections where Depends or sanitary pads are sold.

The wraps are well tolerated by pets of all sizes – even finicky cats.

Pet parents find the wraps easy and convenient to use. They are machine washable and can be dried in your clothes dryer on your gentle cycle. Do not use bleach.

What pets benefit from the Diaper Wraps?

Dogs and cats with urinary incontinence, as well as females in their heat cycle.

The diaper wraps are available in a number of patterns from hearts and flowers to cute little animals, as well as seasonal designs and solids. Our patients and pet parents have been happy with the results. We think you will be too.

**The wraps are well tolerated
by pets of all sizes.**

the
FEMWRAP

FemWrap is available in a number of patterns and colors.

the
MALEWRAP

MaleWrap is available in a number of patterns and colors.

Ordering FemWrap / MaleWrap

To order FemWrap, follow the instructions for proper measurements and send the form:

- By email to: info@Biko-NorthAmerica.com
- By mail to: Annie Janis, c/o Biko Physio Brace, North America, LLC, 2108 Fairview Road, Raleigh, NC 27608
- By fax to: 919-803-8737

*The Diaper Wraps are produced individually for your pet and can be delivered to you within 4-7 days.
For more information, call Annie Janis at Biko Physio Brace, North America, LLC at 919-649-6199*

Measurement Instructions

Since each breed's physiognomy is different, it's important to customize the Diaper Wrap to your pet's measurements.

FemWrap

- 1 Measure waist diameter: _____ inches
- 2 Measure segment of waist under belly: _____ inches
- 3 Measure on "belly side" from waist to ¼ inch above anus (that is where segment for tail begins): _____ inches
- 4 Measure on "dorsal (spine) side" from waist to ¼ inch below anus: _____ inches

MaleWrap

- 1 Measure waist diameter: _____ inches
- 2 Measure width needed to cover penis: _____ inches
